Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in April and June 2005 and WBCR was not observed. The stream did not meet the maximum or average depth criteria at 4 of 4 sites. 7 interviews were conducted, citing fishing and frogging and stating no WBCR due to too many snakes. Because of the overall shallow depth of the stream, the committee recommends removing the WBCR designation. However, the stream should be considered for Secondary Contact Recreation use.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
